PROFESSIONAL SUMMARY

Software developer and 2026 ICT Application Development graduate from Sol Plaatje University, certified in Microsoft Azure Fundamentals and Microsoft Certified: SQL AI Developer Associate (DP-800). Builds end-to-end applications using Python, FastAPI, React, Java, Spring Boot, ASP.NET Core and SQL. Developed a geospatial intelligence platform combining satellite, climate and land-cover data, alongside mobile and business applications with REST APIs and relational databases. Brings analytical problem-solving, technical communication and teamwork from software projects, academic tutoring and student leadership. Seeking junior software developer and IT graduate opportunities.

EXPERIENCE

FASSET Buddy (Academic Support Tutor) - Sol Plaatje University Jul 2025 - Nov 2026

- Supported first-year ICT students through individual and group tutoring in programming and systems concepts.
- Explained technical concepts for different learning needs, developing students' confidence and problem-solving skills.

Moroka Residence House Committee - Sol Plaatje University Feb 2025 - Nov 2025

- Served as an elected student representative, supported conflict resolution and coordinated academic and social programmes.

Sales Assistant - Moosa Wholesaler Mar 2023 - Dec 2023

- Assisted customers, processed cash and card transactions and supported stock control and replenishment.

EDUCATION

Diploma in ICT: Application Development - Sol Plaatje University 2026

Completed in 2026. Relevant coursework: Programming, Database Systems, Systems Analysis and Design, Software Engineering, Data Analysis, Networking and Web/Mobile Development.

National Senior Certificate - Siyaphambili Secondary School 2022

SKILLS

Programming languages: Python, Java, JavaScript, C#, SQL
Frameworks & development: FastAPI, React, React Native, Spring Boot, ASP.NET Core, Node.js, Express.js, Java Swing, Entity Framework Core
Databases & tools: MySQL, SQL Server, SQLite, Firebase, Git, HTML/CSS, Tailwind CSS, MapLibre GL, Swagger, Microsoft 365
Software practices: SDLC, Agile, REST APIs, JWT, role-based access control (RBAC), unit testing (JUnit, xUnit)
Professional skills: Problem-solving, leadership, mentoring, teamwork, communication and time management

CERTIFICATIONS

Microsoft Certified: SQL AI Developer Associate - Microsoft | 14 November 2026
Microsoft Certified: Azure Fundamentals - Microsoft | 5 October 2026
Data Science Methodology - IBM Developer Skills Network | 16 May 2025

PROJECTS

MineLand Nexus - Satellite Land-Intelligence Platform

Python • FastAPI • React 18 • MapLibre GL • SQLite • Sentinel-2

- Architected and delivered a full-stack land-intelligence platform that transforms confirmed South African land boundaries, photo GPS and GeoJSON inputs into structured assessments.
- Engineered a Python/FastAPI analysis pipeline integrating Sentinel-2 imagery, historical land-cover, climate and terrain datasets, with background processing and SQLite persistence.
- Implemented NDVI trend forecasting with historical backtesting and constraint-aware solar/restoration screening, producing traceable reports that flag uncertainties and evidence gaps.
- Built an interactive React/MapLibre mapping interface with evidence views and JSON export; verified core functionality through 31 passing backend tests and desktop/mobile workflow checks.

GitHub repository: mineland-nexus

Campus Connect - Student Ride-Sharing App

React Native / Expo • Spring Boot • MySQL • JWT • WebSockets

- Completed a student-focused ride-sharing application with rider, driver, administrator and campus-security workflows using a fuel-share model.
- Built a three-tier React Native/Spring Boot application backed by an eight-table MySQL schema and ERD/UML documentation.
- Designed GPS tracking, student verification and SOS workflows, with role-specific rider, driver, admin and security permissions.

GitHub repository: Campus-Ride-Connect

Safari Wheels - Luxury Car Rental Platform

React 18 • ASP.NET Core 8.0 • Entity Framework Core • SQL Server • JWT

- Built a full-stack rental platform for vehicle browsing, bookings, reviews and fleet management with flexible pricing.
- Developed React and ASP.NET Core REST APIs with SQL Server/EF Core migrations, Swagger documentation and xUnit tests.
- Implemented JWT authentication, role-based authorisation, BCrypt password hashing and server-side validation.

GitHub repository: SAFARI-WHEELS

Urban Style Restaurant (Taste Heaven) - Restaurant Management System

Java • Android SDK • Firebase • Java Swing • MySQL

- Developed Android and desktop applications for customer, waiter, chef and manager workflows.
- Used Firebase for mobile authentication and order synchronisation and MySQL for the desktop application.
- Delivered menu browsing, reservations, order tracking and inventory alerts through role-based dashboards, with structured access/input tests.

GitHub repository: My-Restuarant-project

Neliswa Sigwebela - Fashion Designer Portfolio

HTML • CSS • JavaScript • Bootstrap

- Designed and deployed a mobile-friendly portfolio on GitHub Pages with collection galleries and contact information.

GitHub repository: Neliswa-Fashion-Designer-Portfolio
